# FESTIVAL AND EVENT INFOMATION

Hello and welcome.

Thank you for your enquiry! Orchestra of Objects specializes in designing, building, and installing unique, interactive sound sculptures that blend harmony, creativity, and fun. Our creations invite audiences of all ages and abilities to engage in hands-on music-making, encouraging a playful exploration of sound and rhythm.

This year, we are thrilled to offer a combination of three exciting options for workshops, performances, and installations.

# THE UFOOO INTERGALACTIC MUSIC WORKSHOPS

The UFOOO is a compact, interactive musical installation that transforms participants into cosmic explorers. This unique sound spaceship features pentatonic xylophones, marimbas, bass slap pipes, whistles, and more, creating an interstellar symphony. Participants actively navigate a musical journey through wormholes, cosmic storms, and dimensional sound vortices, with every sound propelling the UFOOO further into the galaxy. As syncopated beats power the ship, the experience becomes an adventurous blend of music and exploration. Bonus: the UFOOO doubles as a parade spectacle, with Captain Be Bop controlling cosmic sounds via foot-activated drums, whistles, and mechanical effects.

# THE SOUND GARDEN FESTIVAL INSTALLATION

The Sound Garden is an enchanting installation of ten interactive musical sculptures crafted from repurposed industrial objects. These unique instruments produce playful sounds—whistles, toots, plinks, and parps—transforming the ordinary into the extraordinary. Arranged to harmonise effortlessly, the garden invites people of all ages and skill levels to explore sound, create melodies, and craft rhythmic grooves. Designed for durability, the instruments encourage hands-on play and are installed for the duration of the event, offering festivalgoers a fully immersive, creative musical experience. The Sound Garden combines art, music, and interaction, making it a memorable highlight for any audience.

# MAKE AND PLAY SOUND SCULPTURE WORKSHOP

Unleash your creativity in the Make and Play Sound Sculpture Workshop—a hands-on, family-friendly adventure! Imagine a giant K'NEX set bursting with musical components, where kids and parents team up to build larger-than-life, crazy, colourful sound sculptures. Together, you'll tinker, experiment, and bring your wildest ideas to life, exploring the magic of sound and rhythm.

The workshop evolves throughout the day, with participants dropping in to add their unique touches. Guided by the ever-energetic Captain Be Bop, you'll construct a spaceship powered by rhythm, launching imaginations into uncharted galaxies. Creativity, collaboration, and music collide in this out-of-this-world experience!
